

EUROSIZE BUS SHELTER STOCKHOLM

Eurosize Bus Shelter Stockholm is the optimal choice when you aim to reach many people quickly and multiple times within Stockholm’s A-region. This network extends from the city center out to the surrounding municipalities across the region.

Eurosize is Sweden’s leading format for outdoor advertising, and it’s easy to see why. Our Eurosize networks are designed to deliver maximum impact through high frequency and broad reach, resulting in low contact costs.

With a backlit surface protected by a sturdy glass panel, Eurosize ensures optimal visibility around the clock, regardless of the season. Most shelters are centrally located and are ideal for creative installations, which we call Innovate, for those looking to elevate their outdoor campaign to the next level.

The carbon footprint for our new products will be reported starting in 2027.
